Environmental Conventions Index (ECI)

📅 2013 - Present

🔗 <https://eci.environmentalgovernance.org/>

Knowledge product co-designed and co-created with Dr. Natalia Escobar-Pemberthy (UMass Boston PhD'18, now at Boston University Institute for Global Sustainability), the Environmental Conventions Index (ECI) is an empirical tool measuring the extent of implementation of multilateral environmental agreements in two clusters – conservation and pollution – since 2001.

The ECI assesses the actions signatory countries have taken to fulfill their international commitments and provides quantitative data on implementation that allows for comparability across countries and conventions.
